

# INVACARE<sup>®</sup> CANADA SCOOTERS

Yes, you can.™

***Yes, you can.®***

Invacare® scooters are designed by a team of engineers and clinicians, with input from casual and everyday riders. The result, is a family of scooters that check off every box in terms of performance, design and comfort.

Featuring everything from indoor micro-portable scooters, to outdoor robust, heavy duty scooters. The Invacare Canada scooter lineup is unparalleled in its offering and presents a solution for every need.

Tested at the world class TÜV certification facility in Germany, Invacare scooters have been certified for safety, function and quality for peace-of-mind reliability and long-lasting durability.

PEGASUS4P-R

## Pegasus<sup>PRO</sup> 4-Wheel Outdoor

Model Numbers:

	Classic Colours		Premium Colours	
Blue	PEGASUS4P-B	Electric Blue	PEGASUS4P-EB	
Red	PEGASUS4P-R	Carmin Red	PEGASUS4P-CR	
Silver	PEGASUS4P-S	Iconic Chrome	PEGASUS4P-IC	
White	PEGASUS4P-W	Luxor Beige	PEGASUS4P-BG	
Green	PEGASUS4P-G	Crystal Copper	PEGASUS4P-CC	

The Pegasus<sup>PRO</sup> is a powerful upgrade to the Pegasus<sup>METRO</sup> and delivers a luxury trim level for discerning riders looking to elevate their driving experience. Equipped with a backlit LCD display, the Pegasus<sup>PRO</sup> provides constant feedback about the performance of the scooter while driving. Additionally, an enhanced battery capacity, larger wheels and new double wishbone suspension combined, make the Pegasus<sup>PRO</sup> the ideal solution for those who want superior performance and functionality from their scooter.

## Features

- An interactive LCD screen – The scooters’ information center displays the time of day, temperature, battery gauge, system messages, odometer and speedometer.
- Programmable electronics, adjustable audible signal volumes and customizable LCD screen brightness.
- Invacare’s Speed Reduction Technology (SRT).
- Ergonomic design to encourage better alignment of the head, shoulders and elbows for a more relaxed driving position.
- Infinite adjustment of the tiller between 70° and 90°.
- 4-pole motor provides reliable performance and a 15 km/h top speed.
- Full front and rear lighting system with automatic brake lights, turning signals and super bright, dual bulb headlights.
- Contoured captain’s chair is height adjustable and offers enhanced multi-position recline, fore/aft adjustment and armrest height, width and angle adjustment capabilities.
- Vertical articulating double wishbone suspension which delivers superior control, performance and comfort.
- 12” black pneumatic tires with polished aluminum rims.
- Two-step brake release lever prevents accidental disengagement out of drive mode.
- Motor and electronics that are protected from corrosion and water, to safeguard the vital workings of the scooter.
- 350 lbs. weight capacity.

# Pegasus<sup>METRO</sup>, Pegasus<sup>PRO</sup>, Comet<sup>PRO</sup> and Comet<sup>ULTRA</sup> Scooter Features

## Intuitive Control Panel

### Pegasus<sup>METRO</sup>

Designed to ensure easy and accurate operation with domed buttons, LED lights and audible signals as well as a lit battery indicator displays remaining battery power.

## LCD Control Panel

### Pegasus<sup>PRO</sup>, Comet<sup>PRO</sup>, Comet<sup>ULTRA</sup>

The LCD screen displays the speed, distance travelled, battery status, time, temperature and system messages.

The screen brightness and the volume of the panel's audible signals can be adjusted through the control panel.

## Ergonomic Steering

The design of the tiller and delta handles encourages better alignment of the head, shoulders and elbows. This, combined with 70°-90° of infinite tiller adjustment places the body into a more relaxed driving position, decreasing strain and increasing comfort.

## Advanced Suspension

### Pegasus<sup>PRO</sup>, Comet<sup>PRO</sup>, Comet<sup>ULTRA</sup>

Vertical articulating double wishbone front suspension delivers superior control, performance and comfort. Together with adjustable suspension in the rear frame, this advanced system provides a smooth drive, improved traction and superior stability over varying terrains.

## Speed Reduction Technology

Maintain optimal control of your scooter with exclusive Speed Reduction Technology (SRT) which slows travel speed while cornering.

# Pegasus<sup>METRO</sup>, Pegasus<sup>PRO</sup>, Comet<sup>PRO</sup> and Comet<sup>ULTRA</sup> Scooter Features

---

## Programmable Electronics

Invacare scooters are fully programmable by a provider technician to adjust driving performance, maximum speed, sleep timers and audible signals. The direction of the throttle can be reversed with a programmer.

## Comfort Seating

Height adjustable seat features width and angle adjustable arms, fore/aft adjustment and 360° of rotation. The Comet<sup>ULTRA</sup> seat is 26" wide and is enhanced with pneumatic lumbar support. Dual accessory ports allow for the use of two rear accessories.

## Brake Light/Direction Indicators

Safety and visibility are enhanced with rear brake lights, that engage upon the release of the throttle, left and right direction indicators, which automatically stop blinking after 30 seconds.

## Two-Step Brake Disengagement Lever

Prevents the accidental release out of drive mode.

## Reliable Components

The motor and gearbox have been extensively tested for reliability and durability.

## Secure Transport Brackets

Frame-welded transport tie-down brackets provide four points for securing your scooter during transportation.

**Warranty** Two-year limited warranty against manufacturing defects (excluding upholstered materials, padded materials and tires/wheels). Six months on batteries purchased from Invacare®. Manufacturer's warranty does not cover normal wear.

\*Travel range is an estimate only based on ISO 7176-2 standards determined by testing using a 100 kg/220 lb. dummy. Travel range will vary depending on user weight, speed, battery type, battery condition and charge level, weather, terrain and condition of the drive wheels.

\*\*Weight limit is the maximum total weight of the rider, accessories and additional items the rider may be transporting. Example: If the weight limit of the scooter is 350 lbs. and additional items equal 25 lbs., the maximum rider weight can be 325 lbs.
