For comfortable travel, whatever the distance

Compact models

With their practical format, these models are ideal for everyday use. Easy to fold, they fit neatly into the trunk of any car. Lightweight and stable, they're ideal for active people looking for everyday mobility.

Intermediate models

Heavier and sturdier, these four-wheel-drive models are specially designed for city travel or outdoor outings. Some even offer speeds of up to 15 km/h.

Top-of-the-range models

Looking for exceptional comfort? Sport driving enthusiasts will appreciate these four-wheelers, which offer great maneuverability, even on steep or uneven terrain. Slightly heavier, these models are highly versatile and ideal for long outings.

GOGO GARBON

The best choice among travel vehicles

The Gogo Garbon is ideal for active people. This travel model folds manually and is equipped with an electronic console and contactless key, for greater everyday practicality.

Move freely, with confidence and peace of mind

Walkers and canes

Walkers and canes are indispensable for people with reduced mobility who need extra support in their daily lives.

Why use them and what are the benefits?

- Ideal for short indoor trips
- Guarantee constant safety and reduce the risk of falls
- Lightweight for easy mobility
- Easy to store

Ambulators

Ambulators are the perfect solution for confident walking when a walker or cane is no longer enough to provide the necessary balance.

Why use them and what are the benefits?

- Suitable for indoor and outdoor use
- Equipped with brakes for greater safety
- Offer support to make standing up and sitting down easier
- Reduce fatigue and make walking easier

AMBULATORS

AIRGO EXCURSION

- Side-folding Ambulator
- Ultralight and very strong
- Available in 3 heights and extra-wide model

AIRGO FUSION

- Central "X" folding mechanism for compact storage and easy transport
- Available in 3 heights

STELLA

- Ultra-light aluminum walker
- Maximum comfort thanks to padded seat

WALKERS AND CANES

FOLDING WALKER

- Lightweight, easy-to-fold walker
- Excellent support and maneuverability thanks to front wheels

CANE DÉSAITÉ

- Ergonomic handle for shock absorption
- Grip tip for smooth ground contact

ADJUSTABLE CANE

- Ergonomic handle with cushioned grip for optimum comfort
- Easy push-button height adjustment with 12 settings

CHOOSING THE RIGHT MOBILITY AID

Advice on making the right choice for your needs

Dimensions

Make sure your mobility aid is easy to handle and use where you expect it to be most useful. Indoors, this means it should be of a size that won't prevent it from fitting through door frames, or into corridors or tight spaces such as an elevator.

Portability

Weight is an important factor to consider when buying a bike. If its frame or accessories make it too heavy, it may not completely fulfill its role of facilitating independent travel.

Storage

Some mobility aids are foldable, making them easy to store, whether at home, in a vehicle or elsewhere. It is therefore essential to check the available storage space at home.

GOOD TO KNOW

It's important for the user to be able to operate the opening or closing mechanism on his or her own, so as to be able to use it independently. Don't forget to test it when you visit our branch!

WHY CHOOSE A SELF-LIFTING CHAIR?

Contributing to your daily comfort and safety

Self-raising wheelchairs offer the perfect combination of comfort and practicality. Equipped with an electric mechanism, they raise the user to a position that facilitates safe lifting, reducing the risk of falling.

How do I choose a chair?

There are several criteria to consider, each with its own importance. First of all, the user's height and weight must be considered, as they influence the choice of model.

The number of motors on the chair should also be considered, as this will determine the different positions possible (e.g. sitting, napping, lying down, etc.).

Some advantages to consider

Comfort

In addition to being highly ergonomic, they unfold in a variety of ways, offering a backrest, foam seat and adjustable footrest.

Health

Helps prevent many back and neck pains. Changing positions promotes good blood circulation.

Security

Reduce the risk of falling and the fear of losing balance. Provide great independence for performing simple everyday tasks.

Well-being

Some models may offer different additional options such as a heated and massaging seat function.

LIFT CHAIRS

TRANQUIL 2

- Power headrest that raises the head, neck and shoulders for maximum comfort and support
- Motorized backrest and lumbar support for custom-fitted comfort

HOW TO CHOOSE AN ELECTRIC WHEELCHAIR?

Our 4 essential criteria for choosing the right electric wheelchair for your needs

1. **Autonomy and mobility**

Allows you to move effortlessly, whether at home, at work or outdoors.

2. **Comfort and support**

The chairs are designed to provide good support for the back, pelvis and sometimes even the head.

3. **Ease of maneuvering**

Very useful in tight spaces thanks to its precise controls.

4. **Easy to transport and store**

The chair folds easily and is easy to store at home or when traveling.

If you have any questions, please do not hesitate to ask a branch advisor, who will be happy to help you by suggesting the product suited to your needs.
